# H 155 Horizontal Flexible Disk Autoloader

**Companion to GSI's Flexible  
Disk Drives**

**Automatically loads and  
unloads diskettes**

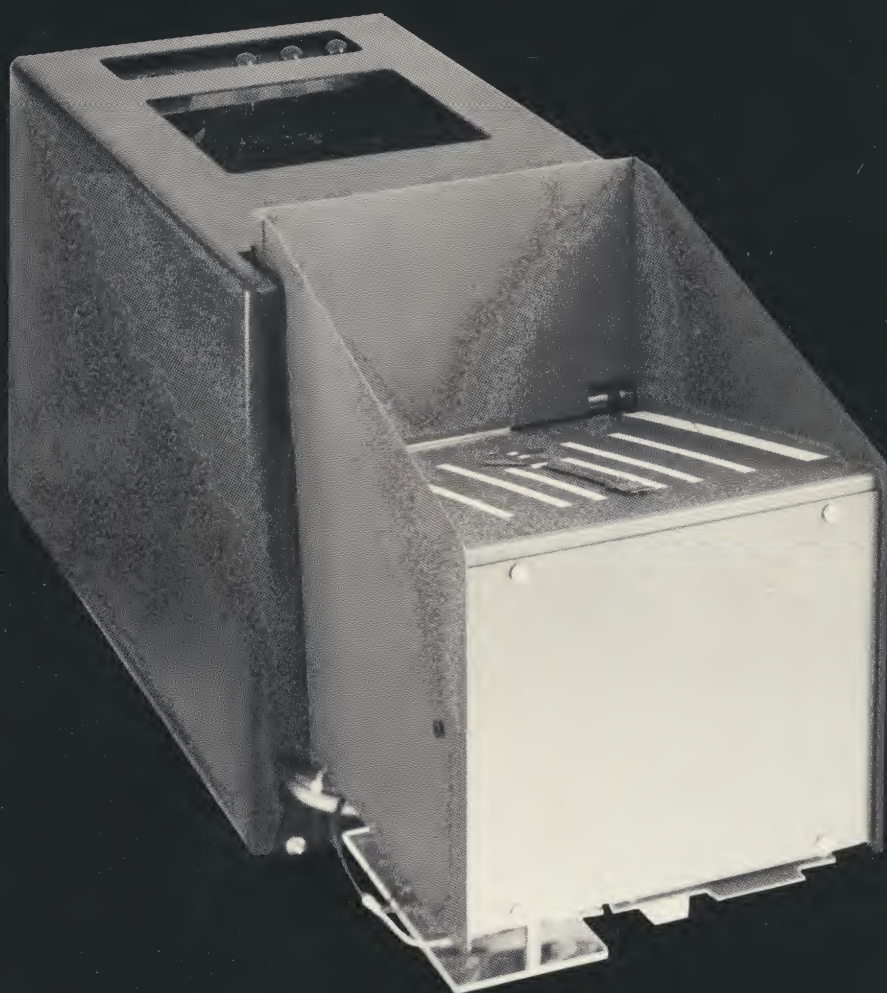

**Processes open or closed  
flap diskettes**

**Stacks and separates  
diskettes**

**30 diskette storage**

**Loads or unloads in less  
than one second**

**17" (H) x 10" (W) x 26" (L)**

# H 155 Horizontal Flexible Disk Autoloader

The H 155 Horizontal Autoloader is designed as a companion to GSI's flexible disk drives. It permits the processing of up to 30 diskettes, without operator assistance, automatically loading and unloading diskettes. It assists the host system to certify or initialize medium with open or closed flaps. The H 155 is ideal for data transfer from cards, cassettes or tape to sequential diskettes.

In the certification mode, the H 155 automatically separates acceptable and unacceptable medium in its two bins. The bins are removable and suitable for general handling of diskette stacks.

## Technical Data

Cycle Time	
Load	.75 sec.
Unload	.75 sec.
MTBF	6,000 hours
MTTR	20 minutes
Capacity	30 diskettes
Environment	
Temperature	50°F (10°C) to 105°F (41°C)
Humidity	to 80% (relative)
Electrical Requirements	5VDC $\pm$ 10% 0.3 AMPS 24VDC $\pm$ 10% 2.8 AMP/100% Surge 115VDC $\pm$ 10% 60 Hz 1.5 AMP
Weight	36 pounds
